Professional Summary

Operations-focused Engineering graduate from the University of Manchester with experience across hospitality leadership, business systems improvement, commercial analysis, and digital operations. Skilled in team coordination, workflow improvement, high-pressure service delivery, and business growth initiatives. Developed strong commercial awareness through acquisition planning, financial analysis, property development, and operational optimisation projects. Seeking a graduate role in business operations, project management, or business development.

Business & Commercial Projects

Midlands Drinks Consultancy Venture

In Development

- Develop a drinks consultancy concept focused on GP optimisation, premium drinks positioning, and cocktail menu engineering for independent restaurants.
- Conduct market research to identify B2B sales opportunities and develop a targeted client acquisition approach.
- Position the venture around helping operators improve profitability, customer experience, and revenue growth.

Property Development Project

Nov 2025 – Present

- Managed a residential subdivision and refurbishment project with an estimated GDV of £550k–£580k and a projected profit of approximately £200k.
- Coordinated procurement, supplier activity, scheduling, and cost control across a six-month value-add asset improvement project.
- Built a repeatable development workflow to support future projects and progress towards a structured property development business.
- Created significant capital and income value, with forecast rental yields of 8.5% based on purchase price.

Restaurant Acquisition Project

Jan – May 2025

- Led acquisition planning for a hospitality business valued at approximately £700k, developing practical experience in investment assessment.
- Analysed revenue of approximately £1.1m, EBITDA, operating costs, and scalability opportunities to strengthen due diligence skills.
- Prepared a business plan covering operations, financial planning, marketing strategy, and transition planning for a 90-cover restaurant.
- Built a stronger foundation in acquisition strategy, commercial analysis, and structured business planning.

Marketing & Digital Consultancy Project

Jan – Jun 2024

- Supported brand positioning, digital presence, and customer-facing modernisation for a growing hospitality business.
- Assisted with brand identity, marketing direction, and commercial alignment across five locations in Portugal.
- Developed practical understanding of how branding and digital presence contribute to business growth.

Professional Experience

Supervisor & Lead Food Expeditor

Nov 2018 – Present

Chandoke Enterprises, Hospitality Group

Lotus Indian Kitchen, Willington, Derbyshire
The Elephant and Peacock, Milford, Derbyshire

- Supported daily operations across two venues, coordinating front-of-house service and kitchen communication for two teams of 20+ staff.
- Assisted COVID-19 transition to takeaway and delivery-led operations, helping maintain continuity across hundreds of weekly orders.
- Improved workflow efficiency by working with management to refine restaurant systems, team coordination, and service standards across 600+ weekly covers.
- Managed Deliveroo, Just Eat, and App4Food operations, supporting order accuracy and revenue generation of £100k+.

Waiter

Aug – Dec 2021

Hawksmoor Manchester

- Delivered quality customer service within a premium, high-volume environment.
- Developed communication, customer relationship, and service efficiency skills within a structured operational setting.
- Gained insight into how strong systems support consistency, efficiency, and premium brand positioning.

Technical Experience

Twin Tidal Turbine Simulation Research Project

Sep 2022 – Jun 2023

University of Manchester

- Conducted simulation-based research into tidal turbine performance, analysing how design variables affected system efficiency.
- Applied high-performance computing tools to process, manage, and interpret large datasets.
- Translated complex simulation outputs into structured reports and presentations for clear technical communication.
- Strengthened data analysis, research, and evidence-led decision-making skills applicable to business performance analysis.

Mechanical Design Project

Sep – Dec 2022

University of Manchester

- Collaborated in a team of five to develop an assistive mobility product from concept exploration to final design selection.
- Evaluated five design options against usability, feasibility, performance, and manufacturing constraints.
- Developed teamwork, design thinking, and product development skills relevant to business and operational problem-solving.
